# GARDEN

## Connacht Gold

DIY & GARDEN

Single Bend Rose Bench

**SAVE €15.00**

only €44.95

Single Bend Flowers Bench

only €44.95

Sulphate of Iron 25kg

only €12.50

To control moss, you need to apply sulphate of iron, between October and April. Sulphate of iron is not a plant food as such ... it is a source of sulphur which some soils benefit from. It is used because of its acidifying effect on soil to help lime-hating plants to survive in limy soil. It is usually mixed into soil before planting and left for a couple of months. Sulphate of Iron needs to be applied every few years, but will not control moss unless the grass is given adequate feeding.

Railway Sleeper Grade A

only €27.00

Sleeper 2.4mt
